

Power Timer

The Sabertek Power Timer is a simple solution to cutting power to your geyser and planning your power consumption. With 5 modes which cater for any size household and a programmable mode for the techno savvy. The Power Timer works by isolating the geyser when no one is likely to use hot water, you simply heat the water before you will use it and do not waste energy keeping it up to temperature.

SPECIFICATIONS:

- Input Voltage Unit: 230Vac
- High accuracy Clock (up to 10 years time retention).
- USB Connectivity for programming.
- Easy to use Software.

FEATURES:

- Can be installed in the DB board or the roof near the geyser.
